

Ms. Mary Room 9

R.W. Math

Week 1

DAY 1

1. The student will practice basic addition facts by completing the Star Addition Worksheet. The student may use counters such as beans, cereal or a number line to assist him.
2. The student will then complete Cupcake Math in which he must solve the addition problems and color the picture according to the code.

DAY 2

1. The student will practice basic addition facts by completing Baseball Addition # 3. The student may use counters such as beans, cereal or a number line to assist him.
2. The student will then solve Pineapple Addition in which he must count the pineapples to help him add.

DAY 3

1. The student will practice basic addition facts by completing Math Salad 1-10. The student may use counters such as beans, cereal or a number line to assist him.
2. The student will then solve Simple Addition with Watermelon. The student must solve the giving problems inside the watermelon and then circle the problems that match the sum on top of the watermelon. The student may use counters such as beans, cereal or a number line to assist him.

DAY 4

1. The student will practice basic addition facts by completing Sunny Summer Math. The student may use counters such as beans, cereal or a number line to assist him.
2. The student will then solve Watermelon Math. The student must count the watermelons to help him add.

DAY 5

1. The student will practice basic addition facts by completing Tetis Dash Math. The student may use counters such as beans, cereal or a number line to assist him.
2. The student will complete Apple Tree Math. He will solve the addition problems and then color the picture according to the code.

Week 2

DAY 1

1. The student will practice basic addition facts by completing Addition Facts to 12 Sheet 1. The student may use counters such as beans, cereal or a number line to assist him.
2. The student will then solve Simple Addition with Strawberries. The student must solve the giving problems inside the Strawberries and then circle the problems that match the sum on top of the watermelon. The student may use counters such as beans, cereal or a number line to assist him.

DAY 2

1. The student will practice basic addition facts by completing Dino Addition. The student may use counters such as beans, cereal or a number line to assist him.
2. The student will then solve Simple Addition with Pineapples. The student must solve the giving problems inside the Pineapples and then circle the problems that match the sum on top of the watermelon. The student may use counters such as beans, cereal or a number line to assist him.

DAY 3

1. The student will practice basic addition facts by completing Coloring Addition. The student may use counters such as beans, cereal or a number line to assist him.
2. The student will then solve Simple Addition with Oranges. The student must solve the giving problems inside the Oranges and then circle the problems that match the sum on top of the watermelon. The student may use counters such as beans, cereal or a number line to assist him.

DAY 4

1. The student will practice basic addition facts by completing Bubble Gum Math. The student may use counters such as beans, cereal or a number line to assist him.
2. The student will continue practicing basic addition facts by completing coloring by sum. The student will solve the addition problems and then color the picture accordingly.

DAY 5

1. The student will practice basic addition facts by completing Fruity Math Blast. The student may use counters such as beans, cereal or a number line to assist him.
2. The student will complete Gummy Math. He will use the given pictures to help him solve the problems.

Grade 1

Star Addition!

Add the numbers in the stars below.

1.

$$\begin{array}{r} 2 \\ + 5 \\ \hline \end{array}$$

2.

$$\begin{array}{r} 2 \\ + 2 \\ \hline \end{array}$$

3.
